

### Problema 1

```
import java.util.Scanner;

public class Homework {

    public static void main (String [] args) {

        Scanner tastatura=new Scanner(System.in);

        double a=tastatura.nextDouble();

        double b=tastatura.nextDouble();

        double c=Math.sqrt(a*a+b*b);

        tastatura.close();

    }

}
```

### Problema 2

```
import java.util.Scanner;

public class Homework {

    public static void main(String [] args) {

        Scanner tastatura=new Scanner(System.in);

        System.out.println("ore:");

        System.out.println("minute:");

        int a=tastatura.nextInt();

        int b=tastatura.nextInt();

        int c=(a*60)+b;

        System.out.println("Ora="+c);

        Tastatura.close();

    }

}
```

### Problema 3

```
import java.util.Scanner;

public class Homework {

    public static void main (String[] args) {

        Scanner tastatura=new Scanner(System.in);

        int x=tastatura.nextInt();

        int y=tastatura.nextInt();

    }

}
```

```
int z=tastatura.nextInt();  
int m=(x*y)/z;  
System.out.println("Cant="+m);  
tastatura.close();  
}  
}
```
